

SHIVESH SHANDILYA

Senior Fullstack Developer

+91-8882307448 | shivesh.shandilya1@gmail.com | linkedin.com/in/shiveshshandilya

PROFESSIONAL SUMMARY

Senior Fullstack Developer with 8+ years of experience building enterprise web applications across healthcare, insurance, e-commerce, and BFSI. Frontend-heavy expertise in React, TypeScript, JavaScript, responsive and accessible UI architecture, complex data-driven workflows, testing, and performance optimization, complemented by hands-on backend development with Node.js, Express.js, REST APIs, and MongoDB. Experienced in end-to-end feature ownership, API contracts and integrations, CI/CD, observability, production troubleshooting, Agile delivery, code reviews, and mentoring engineers.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, JSON

Frontend: React.js, React Router, Material UI, Tailwind CSS, SCSS/SASS, Responsive Design, Accessibility

Backend: Node.js, Express.js, REST API Development, Webhooks, Asynchronous/Event-Driven Integration

Databases: MongoDB, NoSQL Concepts, Data Modeling

State & Data: Redux, Redux Toolkit, RTK Query, Zustand, Caching

API & Integration: REST APIs, FHIR APIs, Axios, Postman, GraphQL, Apollo Client, DICOM-related Workflows

Testing & Quality: Playwright, Cypress, Jest, Unit/Integration/E2E Testing, SonarQube, Checkly

DevOps & Observability: Azure, Azure DevOps Pipelines, CI/CD Build Validation, Grafana, Datadog, Checkly

Tools & Delivery: Git, GitHub, Jira, Confluence, Vite, Webpack, Storybook, Agile/Scrum, AI-Assisted Development

PROFESSIONAL EXPERIENCE

RamSoft Inc. | Senior Software Developer

Mar 2024 - Aug 2026

Remote | *OmegaAI - Healthcare Imaging / PACS-RIS Platform*

- Owned **end-to-end delivery** of complex healthcare modules, translating product requirements into technical designs, implementation plans, **frontend/backend** changes, tests, controlled releases, and production support.
- Owned the **Coverage/Insurance subsystem** across patient and order workflows, building reusable **React/TypeScript** forms and hooks for add/edit/delete flows, validation, sequencing, insurance-card handling, permissions, and integrations across multiple product contexts.
- Developed and integrated **Node.js/Express REST APIs** and **backend service logic** for healthcare workflows, supporting **Patient, Order, Study**, and scheduling-related operations while coordinating API contracts and data structures with frontend consumers.
- Implemented asynchronous and **event-driven integration patterns** for scheduling and workflow updates using **webhooks**, supporting downstream synchronization and reliable UI/worklist refreshes.
- Designed the frontend architecture for **Order-Level Coverage** and delivered a major **Order Creation / Order Drawer** revamp with dynamic multi-step forms, backend-driven state, conditional workflows, provider search, role-aware UI, and **REST/FHIR** integrations.
- Consolidated duplicated implementations across product contexts into **shared component, hook, and field architecture**; built reusable **Provider / Practitioner Organisation** and form infrastructure to improve maintainability and extensibility.
- Constructed and debugged **FHIR/REST payloads** for Patient, Coverage, ServiceRequest, and related resources; validated APIs in **Postman** and resolved HTTP, integration, and data-contract issues across application layers.
- Built and maintained **Playwright E2E** coverage for critical healthcare workflows and supported unit testing, **SonarQube** quality gates, code reviews, and feature-flagged releases.
- Used **Azure DevOps** for CI/CD build validation and failure diagnosis and **Datadog/Grafana/Checkly** for production diagnostics and operational visibility; reproduced pipeline/E2E failures locally and ran selective pipelines.
- Participated in **technical design**, Jira-based Agile planning, task breakdown, documentation, and mentoring; used **AI-assisted engineering tools** to accelerate implementation and testing.

Technologies: React, TypeScript, JavaScript, Node.js, Express.js, REST/FHIR APIs, MongoDB/NoSQL, Redux Toolkit, RTK Query, Zustand, Material UI, Azure DevOps, Playwright, Jest, Datadog, Grafana, Postman

Mphasis Ltd. | Senior Software Engineer

Dec 2021 - Mar 2024

Pune | **Projects:** TRC Healthcare Internal Dashboard | AIG Consumer Portal | AIG Consultant Direct

- Started as the sole frontend engineer for a new **TRC Healthcare internal dashboard**, establishing the initial React application structure before later leading and mentoring two junior frontend developers.
- Built the core application architecture including **JWT authentication**, role-based access, application layout, navigation, and global state management, supporting users with different and multiple access levels.
- Selected **Redux Toolkit** as the primary state-management approach after technical evaluation and used it for authentication, user/access information, API data, caching, asynchronous flows, and global UI state.
- Designed and implemented reusable, data-heavy UI functionality including **sorting, search, pagination, row actions**, conditional selection, and **row/column drag-and-drop** for Smart Table workflows.
- Assigned frontend work, **reviewed code, mentored junior developers**, and collaborated with API engineers, QA, product stakeholders, and technical leadership to resolve integration issues and guide Agile delivery.
- Developed React-based features for **AIG insurance applications**, including payment and filtering workflows, REST API integrations, responsive AEM pages, Jest unit tests, defect resolution, and **code-coverage** improvements.

Technologies: React, JavaScript, Redux Toolkit, RTK Query, React Redux, SASS, REST APIs, Axios, AEM, Jest

IBM India Pvt. Ltd. | Senior System Engineer

Jan 2021 - Dec 2021

Pune | **Client:** Tiffany & Co. - Global E-commerce Platform

- Developed and maintained responsive, **multilingual e-commerce** functionality using React, JavaScript, SASS, HTML, and CSS across desktop, tablet, and mobile experiences.
- Delivered frontend enhancements and production defect fixes within an **Adobe Experience Manager (AEM)** ecosystem while addressing cross-browser, responsive UI, DOM, and integration issues.
- Investigated frontend performance and UI issues using browser developer tools, **BrowserStack**, and **Lighthouse** while collaborating with distributed teams in Agile delivery.

Technologies: React, JavaScript, Redux, React Router, SASS, HTML5, CSS3, AEM

Tata Consultancy Services | System Engineer

Jun 2018 - Jan 2021

Pune | **Client:** Barclays - Internal Data Portal

- Developed **reusable React components** and frontend features for an internal BFSI data portal while participating in requirement analysis, estimation, Agile delivery, stakeholder discussions, maintenance, and defect resolution.
- Integrated **GraphQL** services using **Apollo Client**, handling queries, cached server data, asynchronous UI states, errors, and client-server data flows.
- Built **Cypress E2E automation** and **Storybook** component examples while contributing to developer-led testing, defect resolution, code quality, and reliable frontend releases.

Technologies: React, JavaScript, Apollo Client, GraphQL, Cypress, Storybook, HTML5, CSS3

EDUCATION

Bachelor of Technology (B.Tech), Electronics and Communication Engineering

Techno India Salt Lake, Kolkata | 2014 - 2018 | CGPA: 8.18
